

Warm-up: Triangle congruence, angles, sides, shortcuts, reasons

1) \overline{EF} corresponds to _____.

2) $\angle E$ corresponds to _____.

3) Name $\angle 1$ with 3 letters:

4) Name $\angle 2$ with 3 letters.

5) Which sides are congruent because F is the midpoint of \overline{GI} ?

6) $\triangle EFI \cong \triangle$ _____ by _____

7) Give four corresponding congruent parts in the two triangles:

8) Since the triangles are congruent, what other two parts are now congruent?

Warm-up: Triangle congruence, angles, sides, shortcuts, reasons

1) \overline{EF} corresponds to \overline{HF} .

2) $\angle E$ corresponds to $\angle H$.

3) Name $\angle 1$ with 3 letters: $\angle EFI$

4) Name $\angle 2$ with 3 letters: $\angle GFH$

5) Which sides are congruent because F is the midpoint of \overline{GI} ?

6) $\triangle EFI \cong \triangle$ $\triangle HFG$ by $\overline{IF} \cong \overline{FG}$
 $\overline{EF} \cong \overline{HF}$
or SAS

7) Give four corresponding congruent parts in the two triangles:

$\overline{EF} \cong \overline{HF}$
 $\angle 1 \cong \angle 2$
 $\overline{IF} \cong \overline{GF}$
 $\overline{GI} \cong \overline{EI}$

8) Since the triangles are congruent, what other two parts are now congruent?

$\angle E \cong \angle H$
 $\angle G \cong \angle I$
