

PreCalculus - our team of teachers is not providing a packet.

Lessons depend on the timing of the days off campus.

I will be communicating through my Remind texting and sending links to documents for students to view as needed. My website will be regularly updated. No assignments will have to be turned in during the time off (unless time extends beyond two weeks). My goal is to not require online access other than by phone.

The Precalculus teachers will be working together to provide the same content and experience for all students.

We all intend to move together through content that is accessible with combinations of notes, videos, assignments, answers, work shown, textbook use, etc. All of us have either a website or a Google Classroom.

Immediate content: linear, absolute value, piecewise functions, difference quotient.

To join my Precalculus Remind:

Text to 81010 the message: @kcge9b
